

THE PROBLEM

Pickup confirmations still run one phone call at a time.

Logistics and field teams keep spreadsheets of provider and site contacts, then manually dial each one to confirm whether machines are ready for pickup or engineer de-installation.

Slow and manual

One rep, one number, one call at a time. Campaigns crawl.

Inconsistent

No script discipline. Outcomes change with whoever dialed.

Unauditable

No recording, transcript, or disposition trail to trust.

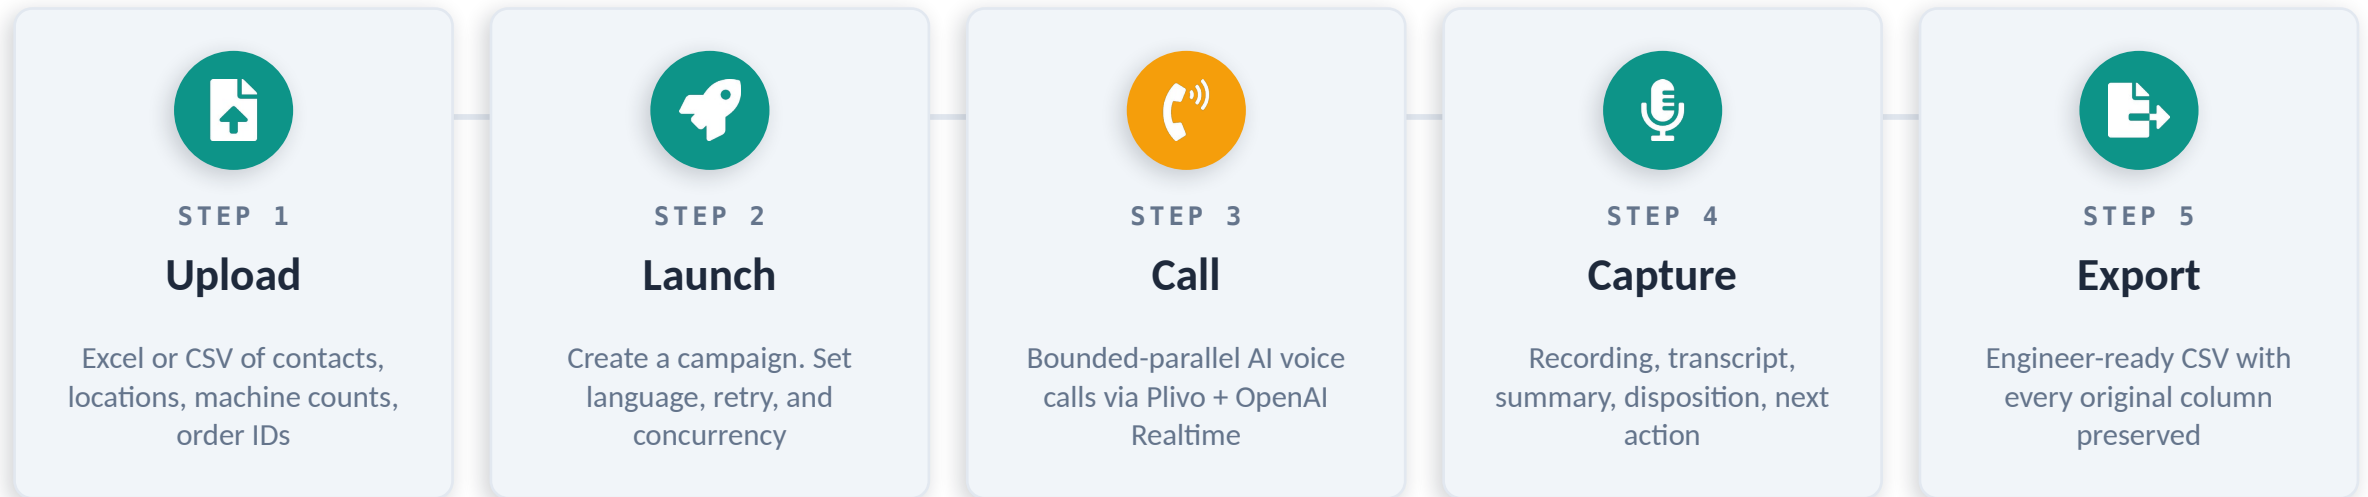

Language wall

India runs on 12+ languages. One agent cannot cover them.

THE SOLUTION

Upload a sheet. The agent calls everyone in parallel and returns engineer-ready outcomes.

A Hindi-first multilingual AI voice agent that replaces manual dialing with bounded-parallel calls, then captures **recording, transcript, summary, disposition, and next action** for every connected call.

✓ Parallel calls (default 5, configurable)

✓ Hindi-first + 11 Indian languages

✓ Full recording & audit trail

✓ Simulated-callback demo fallback

TOOLS & TECH STACK

A thin, reliable, webhook-driven system with one always-on voice bridge.

WEB & API

Next.js on Vercel

Dashboard, upload, campaign APIs, webhooks, cron

REALTIME VOICE BRIDGE

Node WebSocket on Render

Always-on process holding live audio sessions

TELEPHONY

Plivo AudioStream

Outbound calls. Twilio + Exotel adapters ready

VOICE AI

OpenAI Realtime

gpt-realtime, Hindi-first dynamic conversation

DATA

Supabase Postgres

Campaigns, contacts, calls, append-only audit

RELIABILITY

Idempotent by design

Signed webhooks, retries, simulated fallback

FLOW

Plivo → Vercel answer XML → Render voice bridge → OpenAI Realtime → Supabase

WHO USES IT

Built for teams that live on outbound confirmation calls.

Logistics teams

Confirm pickup readiness across providers at scale.

Field operations

Schedule engineer de-installation with verified data.

Support & collections

Run structured outbound campaigns with clean dispositions.

Founders & ops managers

Get auditable, exportable outcomes without chasing reps.

DEPLOY ACROSS

FinTech / POS

Equipment rental

Manufacturing

BFSI field ops

Data-center O&M

Manual dialing out. Auditable, multilingual, parallel AI voice in.
